I have been listening to satellite radio now for about 6 months and find the programming better than the public radio stations. I recently moved from Michigan and find it to be true in Wisconsin as well. Satellite radio is like owning any luxury piece of recreation equipment...you must pay for it in order to use it. If one doesn't want a boat...one doesn't buy a boat. If one wants a new car...one buys a new car. This is a perfect example of how the few in society are being dictated by the masses...please don't take my XM radio away.
